ATTACHMENT #1 –QUALIFICATION REQUEST

Project	:	
Agreement No.	:	
Equipment / Material	:	**Sea Water Screen Package**
M.R. No.	:	
Company	:	**SANGALLI & COLLEONI srl**

1. Purpose

This qualification request (QR) is to qualify **SANGALLI & COLLEONI** Srl, Italy (herein after **S&C srl**) as a supplier of Sea Water Screen Package including any type of: travelling water band screens, rotary drum screens, spray water pumps & debris disposal systems, bar screens, mobile trash-rack rake, fixed installation of ropes type trash-rack rakes, individual revolving rakes, stop-logs, sluice gates, penstocks, instrumentation
& control, PLC cabinet, MCC, impressed current cathodic protection system (ICCP), soluble anodes cathodic protection systems (SACP) including all necessary ancillaries who is a world leader in water engineering and technology.

2. Company's Evaluation

We are herewith submitting company brochure which includes information showing **S&C** Italy organization, list of products, list of equipment, reference list etc.

It is noted from the **S&C srl** reference list submitted that we have experience in supplying of many "water" projects such as: hydroelectric power plants equipment, water flood regulation systems, screening system for sea water intakes of Desalination Plants – Conventional Power Plants - Nuclear Power Plants – Mills factories and so on.
Especially, in the latest years, **S&C srl** has supplied: a) the whole seawater intake facility for MIRFA IWPP (Abu Dhabi-UAE) with **HYUNDAI ENGINEERING & CONSTRUCTION** (South Korea)
as EPC. Seawater Intake facility includes: all stoplogs with guides and lifting beams, six bar screens with individual revolving rakes, six centre flow travelling band screens (four with triangular shape panels + two with flat panels), water level sensors and transmitters, all field instrumentation, spray water system for TBS, PLC control cabinet, dual MCC system, and all ancillaries, b) the whole Nile water intake facility for Beni Suef Combined Cycle Power Plant Project 4800 MW (Egypt) with **ELSEWEDY ELECTRIC-PSP** (Egypt) as EPC, c) the

whole seawater intake facility for the desalination plant of M&G Resins Project (Texas-USA) with **ITALVECO** (Italy) as EPC; d) the whole raw water intake facility for Kirikkale Independent Power Plant with **SAMSUNG ENGINEERING & CONSTRUCTION** (South Korea) as EPC, e) travelling band screen revamping of Marghera Thermal Power Plant (Italy) with **ENEL PRODUZIONE** (Italy) as EPC, f) stop-logs system for Burullus Combined Cycle Power Plant Project 4800 MW (Egypt) with **ORASCOM** (Egypt) as EPC, g) Sluice Gates system for KIMA Fertilizer project (Egypt) with **MAIRE-TECNIMONT** (Italy) as EPC, h) the whole seawater intake facility for RO Desalination Plant of El Galalah Project with

METITO-ORASCOM JV (Egypt) as EPC, i) the whole Make-up Pumps' seawater intake facility for Sabiya Gas Turbines to Combined Cycle Plant CCGT-1 with **ALGHANIM INTERNATIONAL** (Kuwait) as EPC, j) the whole CW Pumps' seawater intake facility for Sabiya Gas Turbines to Combined Cycle Plant CCGT-1 & CCGT-3 with ALGHANIM INTERNATIONAL (Kuwait) as EPC, k) penstocks for Shuaibah III Expansion II Desalination Plant project facilities in KSA with **ABENGOA** (Spain)-**FISIA ITALIMPIANTI** (Italy) JV as EPC, l) the whole seawater intake facility for RO Desalination Plant of Port Said Project with **METITO- CEMENTECH JV** (Egypt) as EPC, m) the whole seawater intake facility for RO Desalination Plant of KING ABDULLAH ECONOMIC CITY - KSA Project with **METITO OVERSEAS LTD.** (Sharjah) as EPC,
n) the whole seawater intake facility for RO Desalination Plant of Sharqiyah, Oman with **DOOSAN HEAVY INDUSTRIES & CONSTRUCTION** (South Korea) as EPC, o) the whole seawater intake facility for RO Desalination Plant of DUBA - KSA Project with **METITO OVERSEAS LTD.** (Sharjah) as EPC, p) the whole seawater intake facility (Drum Screen based) for HAMRIYAH IPP – 1800MW CCPP PROJECT – SHARJAH (UAE) with **TECNICAS REUNIDAS** (Spain) as EPC, q) the intake passive screens with hydro- burst cleaning system for SWCC Barge Mounted RO Desalination Project (KSA) with **METITO OVERSEAS LTD.** (Sharjah) as EPC, r) the whole raw-water intake package for Polimery Police PDH/PP Project – Poland (EU) with **HYUNDAI ENGINEERING Co., Ltd.** (South Korea) as EPC, s) the whole seawater intake facility for LAYYAH 1026MW CCPP PROJECT – SHARJAH (UAE) with **ELSEWEDY ELECTRIC-PSP** (Egypt) as EPC, s) the whole seawater intake facility for RO Desalination Plant of NUWEIBAA PROJECT – EGYPT with **ELSEWEDY ELECTRIC-PSP** (Egypt) as EPC, t) the whole seawater intake facility for RO Desalination Plant of El Arish Project with **METITO-ORASCOM JV** (Egypt) as EPC.

- Società unipersonale soggetta alla direzione e controllo di GEDA s.r.l. -
Capitale sociale €. 100.000,00 I.V. – R.E.A. n° 348026 – Iscr. Reg. Imp. Bergamo n°03082840160 – Cod. Fisc. e Part. IVA 03082840160

Via Roma, 57 24030 – MEDOLAGO (BG) ITALY Phone +39 035 4934311 Fax +39 035 4934332 - web www.sangalliecolleoni.it mail info@sangalliecolleoni.it

Furthermore, **S&C srl** can offer an high qualified engineering in various fields with very skilled engineers in: a) hydraulic steel structure such as trash-rack bar screens with mobile cleaning trash-rack rakes, gates and so on for hydroelectric power plant; b) gates, bridges and ship para-shock system for navigation locks; c) floating gates for dry docks; d) lifting equipment such as overhead cranes, jib cranes and so on.

S&C srl, moreover, operates in the field of structural heavy manufacturing and over the years it has specialized in different application areas. We realize components for the following industrial sectors: machine tools, inert products handling, energy sector, agri-food sector, structural engineering, photovoltaic systems.

We think that our company – **S&C srl** - is a symbol for quality, we have exercised our management in accordance with ISO International Standards for Quality System and obtained its "Quality System Certificate" for ISO 9001. Furthermore, S&C srl is certified for ISO 3834 and EN 1090.

S&C srl is having well defined procedures for procurement of consumables and storage (refer to attached Quality Assurance Manual).

S&C srl also submitted company financial status for past 2 years.

In conclusion, we hope to have shown you that **S&C srl** has reliable capability and sufficient facilities in manufacturing and supplying of Sea Water Screen Packages including any type of: travelling water band screens, rotary drum screens, spray water pumps & debris disposal systems, bar screens, mobile trash-rack rake, fixed installation of ropes type trash-rack rakes, individual revolving rakes, stop-logs, sluice gates, penstocks, instrumentation & control, PLC cabinet, MCC, impressed current cathodic protection system (ICCP), soluble anodes cathodic protection systems (SACP) including all necessary ancillaries.

SANGALLI & COLLEONI s.r.l - ITALY

PRESENTATION

THE COMPANY

S&C srl deals with the design and the manufacture of high quality engineering products. Actively present in Italy and abroad, the company's facilities cover a whole range of activities starting from the total management of projects, to the electrical and mechanical design, costs planning and control, turn-key solutions, after sales service support and spare parts supply, maintenance service, technical consultancy and feasibility studies.

S&C srl has a firm position in the market, joining the design and manufacturing of high-technology systems: full complete water intake facilities for nuclear and thermal power stations, filtering and primary water treatment plants, hydraulic steel structure such as trash-rack bar screens with mobile cleaning trash- rack rakes, gates and so on for hydroelectric power plants; gates, bridges and ship para-shock system for navigation locks; floating gates for dry docks; lifting equipment such as overhead cranes, jib cranes and so on.

FIELDS OF ACTIVITY

In the course of the last years, the activities of S&C srl has been focused on the engineering and supply of highly technological integrated solutions, and time again has demonstrated its expertise in a number of specific fields, namely:

a) **Sea/river Water Intake Facilities for nuclear and thermal power stations, desalination plants, mill factories and so on. Main equipment of Sea/river Water Intake Facilities are:**
   - **Stop-logs and manual/motorized gates**
   - **Raked bar screens**
   - **Removable bar screens**
   - **Travelling band screens**
   - **Rotating Drum screens**
   - **I&C systems**
   - **MCC**
   - **ICCP**
   - **Ancillaries**

- Società unipersonale soggetta alla direzione e controllo di GEDA s.r.l. -
Capitale sociale €. 100.000,00 I.V. – R.E.A. n° 348026 – Iscr. Reg. Imp. Bergamo n°03082840160 – Cod. Fisc. e Part. IVA 03082840160

Via Roma, 57 24030 – MEDOLAGO (BG) ITALY Phone +39 035 4934311 Fax +39 035 4934332 - web www.sangalliecolleoni.it mail info@sangalliecolleoni.it

b) Hydraulic steel structure hydroelectric power plants
- **Trash-rack bar screens with mobile cleaning trash-rack rakes**
- **All kinds of gates**
- **Hoisting facilities**
- **Penstocks**

c) Machineries and equipment for waste water and seawage treatment plants
- **Rotary Drum Screens and so on.**
- **Perforated Belt Screens and so on.**
- **Screw Conveyors and so on.**

d) Electro-mechanical equipment for navigation locks equipment structure hydroelectric power plants
- **Da Vinci lock gates**
- **Sliding lock gates**
- **Culvert gates**
- **Boats para-shock devices**
- **Movable steel bridges**
- **Power and control systems**

e) Material Handling
- **Overhead cranes and dedicated hoisting systems for the above packages**

f) Project and Feasibility Studies
- **S&C srl provides its Customers with turn-key solutions and comprehensive after-sale service, produces quality products which always comply with ISO9001- 2000 standards or better, and last generation hardware and software.**

g) S&C srl provides a full assistance to the erection and commissioning of the supplied equipment covering all the technical specializations that are required including: civil works TA, mechanical TA, electrical TA, instrumentation TA, software & PLC TA, ICCP TA. All the site activities can be also supported with a tele-assistance service.

h) Last, but not least, S&C srl provide its Customers with reliable maintenance back-up services and constant technical support, all within a dedicated Customer oriented environment.

COMPANY ORGANIZATION

S&C srl is organized to fully meet the requirements of extremely demanding customers, both in the public and in the private sector.

Dedicated project managers follow each job from the first step to the final delivery of the equipment, working in symbiosis with the S&C srl engineers, with its suppliers and subcontractors - all aimed to accomplish the Client's requirements in the most minute details.

- Società unipersonale soggetta alla direzione e controllo di GEDA s.r.l. -
Capitale sociale €. 100.000,00 I.V. – R.E.A. n° 348026 – Iscr. Reg. Imp. Bergamo n°03082840160 – Cod. Fisc. e Part. IVA 03082840160

The Company is able to operate, both with regard to the manufacture and to the delivery of the works, in all areas across the world. By adopting an in-house group

manufacturing policy, it is able in all instances to exercise a constant and direct control on the final quality of each product and on the time schedule of each and every project.

Highly skilled and constantly trained site engineers are dedicated to the supervision and planning of site activities relative to the erection of the equipment up to the final tests and handover to the client, and, finally, to the maintenance and assistance services.

The Idea

S&C srl is now a constantly growing production group and a reliable business partner, able to fully guarantee the respect for contractual terms, delivery time and customers' requests for cost- effectiveness and assistance.

With the experience gained from its 50 years of collaboration with the most important industrial areas and the support of qualified suppliers, S&C srl has acquired considerable experience in the field of metal, mechanical, structural carpentry and in water treatment solutions. All our supplies can be equipped with certification, assembly instructions and operations and final test. Moreover we can provide all kind of transport, both national and international. Working closely with customers from the feasibility study of investment, S&C srl builds, installs and commissions, using its own staff and resources and the consolidated collaborations of partner companies in specific disciplines. S&C srl operates on an area of 28,000 sqm and our workshops cover more than 6000 sqm., allowing us to accomodate the equipment and machinery necessary to satisfy any type of request from the reference market. Our headquarters and operational offices are located in the industrial Zone Medolago (Bergamo), a few kilometers from the main roads and motorways and the most important airport (from Milan Malpensa (MPX) drive 1 hour, from Milan Linate (LIN) or Milan Orio al Serio (BGY) ½ hour).

About us

S&C srl operates in the field of structural heavy manifacturing and over the years it has specialized in different application areas. We realize components for the following industrial sectors: energy sector, oil & gas sector, inert products handling, structural engineering.

Main works performed:
S&C srl fulfils metal structural work for

- Steel plants
- Water screening equipment
- Cathodic protection System
- Energy
- Engineering
- Inert products handling
- Structural engineering
- Civil and industrial buildings
- Cranes and lifting apparatus
- Plant for steel industry
- Plant and structures for energy production
- Production of welded girders

What we do

For customers who develop engineering for their products and are seeking a faithful and reliable realisation of their ideas, S&C srl provides cutting edge production technologies.

The factory is equipped with equipment and machinery for:

- Assembly structural metalworking and MIG-MAG-TIG welding
- Sandblasting and painting
- Conventional mechanical works (cutting, bending, calendering)
- Conventional CNC works
- Assembly and testing
- Heat Treatments
- Analysis welds (VT-PT-MT-UT-RT)
- Painting and Galvanisation
- Packing and Transport

Our operators are specialized and qualified in welding and CND.

S&C srl provides with its technical staff all the quality control respecting the international law.

Products

S&C srl has grown, thanks to its strong entrepreneurial spirit and the constant search for quality, and today has a presence on the market with three divisions:

- the first meets the needs of metalwork of device noise protection of up to a unit dimensions with dimensions LxWxH = 14x4x4 m.;
- the second, designed for the production and assembly of water screening equipment;
- the third is specialized in steel works as Exhaust ducts, Chimney, Air Intake System ect.

Certification

Quality and certifications are for S&C srl not only an obligatory step to meet law and customers' needs, but also a distinctive feature for the company, which has always worked paying strong attention to quality and to the performance characteristics.

The firm is equipped with its own technical staff for the quality control and for the management of the whole corporate system for quality assurance.

S&C srl is certified:

- ISO 9001:2015 for the quality process;
- ISO 3834-2:2021 for control of the welding process;
- UNI EN 1090-1 Control of the factory production for the fulfillment of steel structural components, class of execution EXC3 (and lower) for steel groups 1.1, 1.2, 8.1
- ISO 45001 Occupational health and safety management system
- EN 13084-7 Certificate of conformity of factory production control, for free standing chimney;

LRQA

Certificate of Conformity of Factory Production Control

This certificate is issued to:

Manufacturer: Sangalli & Colleoni S.r.l.
Via Roma 27
24030 Medolago (BG) – Italy

In compliance with Regulation 305/2011/EU of the European Parliament and of the Council of 9 March 2011 (the Construction Products Regulation or CPR), this certificate applies to the construction product:

Cylindrical steel fabrication used in single wall steel chimneys and steel liners.

This certificate attests that all provisions concerning the assessment and verification of constancy of performance and the performances described in Annex ZA of the standard(s)

EN 13084-7 – 2012 - Free-standing chimneys – Part 7: Product Specification of cylindrical steel fabrication for use in single wall steel chimneys and steel liners.

under system 2+ are applied and that the factory production control is assessed to be in conformity with the applicable requirements.

The attached Schedule, of the same date, details the manufacturing location(s), harmonized product standard and product parameters and shall form a part of this certificate.

This Certificate will remain valid as long as the test methods and/or factory production control requirements included in the harmonised standard, used to assess the performance of the declared characteristics, do not change, and the product, and the manufacturing conditions in the plant are not modified significantly.

Certificate No:	0094/CPR/MAD/4961/01 ENG
Original Approval:	31 December 2020

ATTACHMENT #10 & #11

POLICY OF QUALITY

Sangalli e Colleoni Srl aspires to become a reference company in the metalworking sector, through the development of a business model capable of satisfying:

- Standards, laws, directives and regulations regarding quality, environment and safety;
- Customer requirements;
- Human relations with internal and external staff.

The values in which **Sangalli e Colleoni Srl** believes are:

- Integrity: proud to be a group of correct and loyal people;
- Transparency: sincere and clear towards customers and all interlocutors;
- Responsibility: committed to the good of the company;
- Consistency: Focus on doing what we say.

This Policy, consistently with the Code of Ethics referred to in the Organizational Model Legislative Decree 231/01, is based on a set of principles to which specific strategies and objectives refer.

1. RESPONSIVENEES TO CUSTOMER NEEDS

Which translates to:

- Guarantee compliance with contractual, technical and qualitative requirements, including mandatory ones at all levels;
- Increase the reliability of the product and service;
- Increase customer satisfaction;
- Develop and optimize processes and know-how.

2. TRAINING AND RESOURCES

Which form the basis for achieving the objectives of the integrated management system and translate into:

- Strengthen the level of competence, professionalism, involvement and motivation of employees;
- Promote the cultural growth of the company and the search for the causes of problems that occur;
- Insert and train new staff to remain competitive in the future;
- Make adequate resources available (structures, vehicles, systems,
- Ensure a high level of maintenance, safety and reliability of the vehicles available;
- Ensure a safe, healthy working environment conducive to the correct execution of work activities, in order to prevent injuries and illnesses;
- Maintain a high level of supplier performance.

3. STRATEGY

Which is focused on:

- Define measurable and comparable objectives and goals, with related indicators, considering aspects of quality, safety and the environment in every action and decision made and pursuing continuous improvement in performance;
- Promote problem solving and preventative activity, also with a view to eliminating dangers and reducing health and safety risks;
- Consolidate the structure and corporate size;
- Produce economic results that satisfy the Management;
- Maintain the margins acquired by dedicating part of it to investments aimed at improving competitiveness at all levels;
- Consolidate and increase the number of customers and understand the needs of the market;

- Società unipersonale soggetta alla direzione e controllo di GEDA s.r.l. -
Capitale sociale €. 100.000,00 I.V. – R.E.A. n° 348026 – Iscr. Reg. Imp. Bergamo n°03082840160 – Cod. Fisc. e Part. IVA 03082840160

- Increase commercial activities to identify new market opportunities, with particular attention to the energy sector, which we have historically served;
- Continuously improve the level of services provided to the Customer to ensure their satisfaction and loyalty
- Prevent and reduce impacts on the environment, operating in particular through:
  - Correct management of discharges, atmospheric emissions and waste, increasingly aimed at respecting the territory;
  - The search for solutions that allow energy saving and the production of energy from renewable sources, limiting the use of fossil fuels.
  - Activate effective measures to prevent accidents and injuries and limit harmful consequences for the environment and safety by adopting the best economically sustainable techniques available.

4. INVOLVEMENT OF STAFF AND SUPPLIERS

Which is focused on:

- Raise awareness of the commitments of this Policy, and in particular on the environmental aspects, on the dangers and risks for health and safety and on quality, among both Sangalli and Colleoni Srl personnel and external personnel;
- Motivate staff to develop, at every level, a sense of responsibility towards quality, safety and the environment also through training courses;
- Improve the internal organisation, in particular the interfaces between the various functions, in order to improve the effectiveness and efficiency of the processes;
- Involve staff in company objectives and processes, encouraging consultation and participation;
- Loyalty the existing supplier base by maintaining an adequate level of alternatives for the goods supplied;
- Educate, with particular attention to the new generations, behaviors that respect the environment and pay attention to the correct use of natural resources.

5. CONCLUSIONS

The General Management also assumes the function of Management Representative for the integrated management system and confers on:

- RQ, Davide Colleoni, authority and means for implementing the Quality System;
- RA, Enzo Sangalli, authorities and means for the implementation of the Safety and Environment System.

The General Management promotes the application, improvement and development of the Integrated Management System and works to ensure that the principles contained in the company documents are disclosed, understood and shared by all employees and collaborators.

This document was disseminated to the first level of the organization through training meetings and to the rest of the organization through display within the premises, in order to ensure its understanding by all staff.

Based on the general principles set out below, measurable objectives have been defined in more detailed documents which are monitored during annual reviews by the company management, in order to continuously improve the effectiveness of the integrated management system and verify the adequacy of the general principles expressed in this document.

Finally, the General Management verifies, during periodic reviews by management, that this Policy is made available, disseminated, kept active and in a correct state of validity and suitability for business strategies.
